When using Wix Studio Editor, please provide a detailed step-by-step explanation of the operations that I must perform to create a very comprehensive group of styles for my future websites, following the Google Material design system specs.

Please provide instructions like: h1 = (font size), h2 = (font size), etc.

For element spacing, please provide dimensions in pixels

For buttons, please define:
- specs for rounded corners
- border width
- border color
- released - text color   (enabled, not pressed)
- released - background color (enabled, not pressed)
- pressed   - text color
- pressed   - background color
- disabled - text color
- disabled - background color

- hover   - background color

For Typography, please define:
- Title Font: Google Sans
- Paragraph font: (most commonly used Paragraph font)

For a suggested color palette, please start with a warm blue primary color, and then provide warm energetic contrasting colors.

For all colors, please provide the most commonly used color value names.

For all setting names, please provide the most commonly used setting
names.

Please provide all color values as Hex RGB color values.

Goal: Configure global design styles in Wix Studio Editor using Google Material Design specifications for typography, spacing, buttons, and color palette.

✅ Step-by-Step: Set Up Global Styles in Wix Studio Editor

1. Typography Settings (Material Design Spec)

Set these under **Design Panel → Typography → Text Styles.**

Text Style	Font	Size	Weight	Line Height	Letter Spacing
h1	Google Sans	96px	Light	112px	-1.5px
h2	Google Sans	60px	Light	72px	-0.5px
h3	Google Sans	48px	Regular	56px	0px
h4	Google Sans	34px	Regular	40px	0.25px
h5	Google Sans	24px	Regular	32px	0px
h6	Google Sans	20px	Medium	28px	0.15px
Subtitle 1	Roboto	16px	Regular	24px	0.15px
Subtitle 2	Roboto	14px	Medium	20px	0.1px
Body 1	Roboto	16px	Regular	24px	0.5px
Body 2	Roboto	14px	Regular	20px	0.25px
Button	Roboto	14px	Medium	16px	1.25px
Caption	Roboto	12px	Regular	16px	0.4px
Overline	Roboto	10px	Regular	16px	1.5px

> ✅ *Use "Google Sans" for headers, "Roboto" for body text—this matches Google's spec.*

2. Spacing / Layout System (8pt Grid)

Set these in **Design Panel → Spacing Tokens (or Layout Tokens):**

Token Name	Value
space-xxs	4px
space-xs	8px
space-sm	12px
space-md	16px
space-lg	24px
space-xl	32px
space-xxl	40px
section-padding	64px

✅ *Use 8px multiples to keep vertical rhythm consistent across devices.*

3. Button Design Settings (Material Spec)

Go to **Design Panel → Components → Buttons.**

State	Text Color	Background Color	Border	Corner Radius
Default	#FFFFFF	#1E88E5	1px solid #1E88E5	4px
Hover	#FFFFFF	#1565C0	1px solid #1565C0	4px
Pressed	#FFFFFF	#0D47A1	1px solid #0D47A1	4px
Disabled	#BDBDBD	#E0E0E0	1px solid #BDBDBD	4px

⚙️ Specs:

- **Border Width:** 1px
- **Border Radius:** 4px
- **Corner Style:** Rounded
- **Hover Style:** Slightly darker background
- **Focus Ring (optional):** 2px solid #2962FF

4. Color Palette: Warm Blue with Energetic Contrasts

Go to **Design Panel → Colors → Global Colors** and define these tokens:

Token Name	Description	Hex Value
color-primary	Warm Blue	#1E88E5
color-primary-dark	Darker Warm Blue	#1565C0
color-primary-light	Light Warm Blue	#90CAF9
color-secondary	Warm Orange	#FB8C00
color-accent	Energetic Yellow	#FDD835
color-success	Rich Green	#43A047
color-error	Bold Red	#E53935
color-surface	White Surface	#FFFFFF
color-background	Soft Gray BG	#F5F5F5
color-on-primary	Text on Primary Background	#FFFFFF
color-on-surface	Text on Surface	#212121
color-disabled	Disabled Gray Text	#BDBDBD

5. Naming Convention (Most Common Global Tokens)

Setting Group	Common Names / Tokens
Typography	heading-xl, heading-lg, body-sm
Spacing	space-xs, space-md, section-padding
Colors	color-primary, color-surface
Buttons	btn-primary-bg, btn-hover-bg

✅ Final Steps in Wix Studio

1. **Enable Dev Mode** (optional, but helps for Velo customization).
2. Go to **Site Styles → Design Tokens → Add/Modify.**
3. Set each token name and value according to the tables above.
4. Apply these tokens across Text Styles, Buttons, Containers, and Sections.
5. Use **Preview Mode** to verify consistent global styling across breakpoints.

Would you like a downloadable `.json` token map or a shared Wix Studio template file with all of this preconfigured?
